Europe Countries - COVID-19 Infections - Highest Daily Cases Reported

1/06/2022, 2:05:59 PM

- European countries are witnessing rise in new COVID-19 infections
- The surge in new COVID-19 infections was due to the highly transmissible 'Omicron variant'
- Greece:
 - The National Public Health Organization (EODY) confirmed 50,126 infections within 24 hours, an all-time high
 - Greek experts expect the number to continue rising this month, with daily cases reaching 80,000 in the coming days
- Hungary:
 - Official data showed 6,454 new infections in a 24-hour span, more than doubling the figures recorded in the previous few weeks
 - The government said on its official website that the new variant is responsible for more than 11% of new infections
- Ireland, Germany, UK, Netherlands, France, Poland, Portugal, Austria, and Spain reported 17,656, 63,191, 194,747, 332,252, 24,490, 332,252, 17,196, 39,570, 9,761, and 137,180 new cases respectively in last 24 hours
- The Spanish Ministry of Health said the 'Omicron' variant is now responsible for 43% of all COVID-19 cases in Spain
- The Netherlands has seen infection rates hiking significantly by 35%
- Health experts advised to take the following measures to combat the pandemic:
 - Mandatory vaccination
 - Mandatory use of FFP2 (Filtering Facepiece Particle) mask in crowded places
 - Only vaccinated and recovered individuals should be allowed too outdoors
- Supply Wisdom will continue to monitor and issue alerts for any relevant developments

Impact level Definitions

Impact Level	Definitions
Immediate	Anticipated disruption intensity is critical, and occurrence is imminent - Supply Wisdom recommends considering immediate review and action.
High	Anticipated disruption intensity is high and/or disruption is likely to occur within 3 months - Supply Wisdom recommends being in a heightened state of readiness to take quick action and confirm response plans/protocols.
Moderate	Anticipated disruption intensity is moderate and/or likely to occur within 3 to 6 months - Supply Wisdom recommends reviewing current mitigation steps and being prepared to take proactive action if and when situation deteriorates further.
Low	Anticipated disruption intensity is low and/or may occur after 6 months - Supply Wisdom recommends taking proactive action if situation does not resolve in approved timeframe.
Informational	The event is pertinent information but does not have a current risk element associated with it.
