Update 16: Peru - Tightens Curbs Amid Omicron Wave

1/07/2022, 12:08:21 PM

- Peru raised its pandemic alert level in various cities and tightened some restrictions due to the third wave of infections
- The alert level went from moderate to high as the average number of daily cases has increased 25% from the previous week
- The number of deaths in the country has only increased moderately, and that the majority of the deaths were among the unvaccinated.
- The heightened restrictions come amid signs that countries across Latin America are entering another wave of COVID-19 infections
- Around 80% of Peru's eligible population has received two doses of the COVID-19 vaccine
- Reported COVID-19 stats for Peru:
 1. Confirmed Cases: 2,318,543
 2. Deaths: 202,904 (8.7%)
 3. Vaccine Doses Administered: 50,345,531
 4. Fully Vaccinated Population: 21,610,701 (67.3%)
- Supply Wisdom will continue to monitor and issue alerts for any relevant developments

Impact level Definitions

Impact Level	Definitions
Immediate	Anticipated disruption intensity is critical, and occurrence is imminent - Supply Wisdom recommends considering immediate review and action.
High	Anticipated disruption intensity is high and/or disruption is likely to occur within 3 months - Supply Wisdom recommends being in a heightened state of readiness to take quick action and confirm response plans/protocols.
Moderate	Anticipated disruption intensity is moderate and/or likely to occur within 3 to 6 months - Supply Wisdom recommends reviewing current mitigation steps and being prepared to take proactive action if and when situation deteriorates further.
Low	Anticipated disruption intensity is low and/or may occur after 6 months - Supply Wisdom recommends taking proactive action if situation does not resolve in approved timeframe.
Informational	The event is pertinent information but does not have a current risk element associated with it.
