Update 42: Hungary - New COVID-19 Wave Reported Amid Surge in 'Omicron' Variant

1/08/2022, 12:52:39 PM

- The Fifth COVID-19 wave was reported in Hungary driven by Omicron Variant
- New cases of the Omicron COVID-19 variant can be expected in Hungary in the coming days
- Hospitalization rate for unvaccinated people may increase in the country
- However, the proportion of serious cases is likely to be lower than in the third and fourth waves
- Omicron variant has significantly more mutations than the other variants, which make it super-contagious
- Also, COVID-19 and influenza's dual infection, "flurona" has occurred in Hungary
- Reported COVID-19 stats for Hungary:
 1. Confirmed Cases: 1,282,957
 2. Deaths: 39,780 (3.1%)
 3. Recoveries: 1,137,648 (88.67%)
 4. Vaccine Doses Administered: 15,502,257
 5. Fully Vaccinated Population: 6,006,178 (61.5%)
- Supply Wisdom will continue to monitor and issue alerts for any relevant developments

Impact level Definitions

Impact Level	Definitions
Immediate	Anticipated disruption intensity is critical, and occurrence is imminent - Supply Wisdom recommends considering immediate review and action.
High	Anticipated disruption intensity is high and/or disruption is likely to occur within 3 months - Supply Wisdom recommends being in a heightened state of readiness to take quick action and confirm response plans/protocols.
Moderate	Anticipated disruption intensity is moderate and/or likely to occur within 3 to 6 months - Supply Wisdom recommends reviewing current mitigation steps and being prepared to take proactive action if and when situation deteriorates further.
Low	Anticipated disruption intensity is low and/or may occur after 6 months - Supply Wisdom recommends taking proactive action if situation does not resolve in approved timeframe.
Informational	The event is pertinent information but does not have a current risk element associated with it.
