Update 77: Israel - COVID-19 Restrictions Eased Despite Surge in Cases

1/09/2022, 11:07:45 AM

- On January 07, 2022, Israel confirmed its highest ever number of new COVID-19 cases
- This was driven by the highly contagious 'Omicron' variant
- The number of new daily cases has continued to climb over the past week
- In addition, the number of severe COVID-19 cases climbed to 172, up from 143 cases
- Relaxed rules on tourists' entry into Israel are set to go into effect to ease pandemic restrictions
- More people in Israel are getting tested after the government policy mandate
- Healthy, vaccinated Israelis are permitted to take at-home rapid tests
- Tourists arriving in Israel will be required to fill out an online form before their flight
- They must take a polymerase chain reaction (PCR) test before boarding their plane and when they land in Israel
- This applies to passengers who are either vaccinated or had COVID-19 and recovered
- Unvaccinated tourists are not allowed into the country
- All arrivals undergo a test at the airport or other points of entry
- Reported COVID-19 stats for Israel:
 1. Confirmed Cases: 1,485,598
 2. Deaths: 8,259 (0.56%)
 3. Recoveries: 1,369,100 (92.16%)
 4. Vaccine Doses Administered: 16,892,517
 5. Fully Vaccinated: 5,959,721 (64.9%)
- Supply Wisdom will continue to monitor and issue alerts for any relevant developments

Impact level Definitions

Impact Level	Definitions
Immediate	Anticipated disruption intensity is critical, and occurrence is imminent - Supply Wisdom recommends considering immediate review and action.
High	Anticipated disruption intensity is high and/or disruption is likely to occur within 3 months - Supply Wisdom recommends being in a heightened state of readiness to take quick action and confirm response plans/protocols.
Moderate	Anticipated disruption intensity is moderate and/or likely to occur within 3 to 6 months - Supply Wisdom recommends reviewing current mitigation steps and being prepared to take proactive action if and when situation deteriorates further.
Low	Anticipated disruption intensity is low and/or may occur after 6 months - Supply Wisdom recommends taking proactive action if situation does not resolve in approved timeframe.
Informational	The event is pertinent information but does not have a current risk element associated with it.
