Update 22: Argentina - COVID-19 Infections - Highest Daily Cases Reported

1/12/2022, 10:04:36 AM

- Argentina registered 134,439 COVID-19 cases in the last 24 hours
- The Health Ministry reported 52 COVID-19 deaths bringing the number of fatalities to 117,595
- The country is facing a third COVID-19 wave due to the 'Delta' and 'Omicron' variants
- Meanwhile, the Health Minister recommended the isolation of close contacts of confirmed COVID-19 cases
- Despite the surge, as per new guidelines, those who have received three doses of vaccine will be exempted from isolation
- Unvaccinated people, or those who were vaccinated before August 2021, will have to be isolated for ten days
- Reported COVID-19 stats for Argentina:
 1. Confirmed Cases: 6,533,635
 2. Deaths: 117,595 (1.80%)
 3. Recoveries: 5,654,746 (86.55%)
 4. Vaccine Doses Administered: 80,148,330
 5. People Fully Vaccinated: 33,372,397 (74.3%)
- Supply Wisdom will continue to monitor and issue alerts for any relevant developments

Impact level Definitions

Impact Level	Definitions
Immediate	Anticipated disruption intensity is critical, and occurrence is imminent - Supply Wisdom recommends considering immediate review and action.
High	Anticipated disruption intensity is high and/or disruption is likely to occur within 3 months - Supply Wisdom recommends being in a heightened state of readiness to take quick action and confirm response plans/protocols.
Moderate	Anticipated disruption intensity is moderate and/or likely to occur within 3 to 6 months - Supply Wisdom recommends reviewing current mitigation steps and being prepared to take proactive action if and when situation deteriorates further.
Low	Anticipated disruption intensity is low and/or may occur after 6 months - Supply Wisdom recommends taking proactive action if situation does not resolve in approved timeframe.
Informational	The event is pertinent information but does not have a current risk element associated with it.
