## Global Countries - New COVID-19 'Omicron' Sub-Variant 'Stealth Omicron' (BA.2) Cases Identified

1/22/2022, 1:26:37 PM

- The COVID-19 'Omicron' sub-variant BA.2 has been identified in several countries
- The sub-lineage, dubbed 'Stealth Omicron', was designated in early December last year
- This sub-variant of Omicron has raised fears as it is a more transmissible strain and could spark larger COVID-19 waves globally
- The health authorities in the UK have designated the sub-variant BA.2, as 'variant under investigation'
- The UK has detected 53 cases of Omicron sub-variant
- Last week, Greek health authorities identified two cases of the Omicron sub-variant in travelers
- Earlier, Israel's Health authorities had reported 20 cases of Omicron sub-variant
- The sub-variant has also been observed in Denmark, Australia, Canada, China, India, and Singapore
- The BA.2 sub-variant of Omicron was first detected in Denmark in November 2021
- Supply Wisdom will continue to monitor and issue alerts for any relevant developments

## Impact Level Definitions

Impact Level	Definition
Immediate	<b>Anticipated disruption intensity is critical, and occurrence is imminent</b> - Supply Wisdom recommends considering immediate review and action.
High	<b>Anticipated disruption intensity is high and/or disruption is likely to occur within 3 months</b> - Supply Wisdom recommends being in a heightened state of readiness to take quick action and confirm response plans/protocols.
Moderate	<b>Anticipated disruption intensity is moderate and/or likely to occur within 3 to 6 months</b> - Supply Wisdom recommends reviewing current mitigation steps and being prepared to take proactive action if and when situation deteriorates further.
Low	<b>Anticipated disruption intensity is low and/or may occur after 6 months</b> - Supply Wisdom recommends taking proactive action if situation does not resolve in approved timeframe.
Info	The event is pertinent information but does not have a current risk element associated with it.
