IMPACT LEVEL

High

Update 117: New York, United States of America - COVID-19 Alert Level Raised from 'Medium' to 'High' Due to Continued Surge in Cases

5/18/2022, 7:06:37 AM

- The 'high' COVID-19 alert level rating means there is a high COVID-19 community spread and pressure on the health care system in the city
- The guidance requires New Yorkers to wear a face mask in all public indoor settings and crowded outdoor settings and consider avoiding higher-risk activities
- In early May 2022, New York City raised its COVID-19 alert level to 'medium' from 'low'
- The seven-day average percentage of positive COVID-19 test results rose to 5.18% in New York City on May 16, 2022
- Daily new cases in the United States have been on the rise since early April 2022
- The death toll from the pandemic has surpassed 1 million in the country
- **Reported COVID-19 stats for US:**
 1. Confirmed Cases: 84,473,447
 2. Deaths: 1,027,285 (1.22%)
 3. Recoveries: 81,380,775 (96.34%)
 4. Vaccine Doses Administered: 581,841,230
 5. Fully Vaccinated: 220,618,615 (66.9%)
- Supply Wisdom will continue to monitor and issue alerts for any relevant developments

TARGET(S) AFFECTED

New York - United States of America

RISK DOMAIN(S)

ESG

EVENT TYPE(S)

Coronavirus (COVID-19) Incident(s)

GUIDANCE

Actions to Consider

- New York is a global hub of business and commerce, as a center for banking and finance, retail, world trade, transportation, tourism, real estate, new media, traditional media, advertising, legal services, accountancy, insurance, theater, fashion, and the arts in the United States. The United States of America is the world's largest national economy and leading global trader. Be prepared for possible disruptions to businesses in the regions due to the reported incident
- Consider implementing suggested government and company-approved actions related to the current COVID-19 situation. The latest updated information is available at (<https://www.hhs.gov/>)

Impact Level Definitions

Impact Level	Definition
Critical	Anticipated disruption intensity is critical, and occurrence is imminent - Supply Wisdom recommends considering immediate review and action.
High	Anticipated disruption intensity is high and/or disruption is likely to occur within 3 months - Supply Wisdom recommends being in a heightened state of readiness to take quick action and confirm response plans/protocols.
Moderate	Anticipated disruption intensity is moderate and/or likely to occur within 3 to 6 months - Supply Wisdom recommends reviewing current mitigation steps and being prepared to take proactive action if and when situation deteriorates further.
Low	Anticipated disruption intensity is low and/or may occur after 6 months - Supply Wisdom recommends taking proactive action if situation does not resolve in approved timeframe.
Informational	The event is pertinent information but does not have a current risk element associated with it.
