Update 53: Russia - COVID-19 'Omicron' Sub-Variant 'BA.4' - First Case Reported

6/12/2022, 12:18:55 PM

- On June 12, 2022, the Russian Health Ministry (Rosпотребнадзор) stated that it has detected a case of COVID-19 subvariant 'Omicron' 'BA.4' in the country
- A viral genome of the 'BA.4' sub-lineage has been submitted to national labs for identification
- Currently, 'BA.2' variant and its sub-variants are dominant in Russia, accounting for 95% of the new COVID-19 cases
- Reports stated that 'BA.4' and 'BA.5' sub-variants are more transmissible
- Russia reported 3,627 COVID-19 cases and 72 deaths on June 11, 2022
- **Reported COVID-19 stats for Russia:**
 1. Confirmed Cases: 18,376,587
 2. Deaths: 380,020 (2.07%)
 3. Recoveries: 17,794,561 (96.83%)
 4. Vaccine Doses Administered: 167,234,970
 5. Fully Vaccinated: 73,998,668 (50.4%)
- Supply Wisdom is continuously monitoring the situation and will alert you to any relevant developments

GUIDANCE

Actions to Consider

- Russia or the Russian Federation is a transcontinental country spanning Eastern Europe and Northern Asia. It is the largest country in the world by area. Russia has a mixed economy, with vast natural resources, particularly oil and natural gas. Be prepared for possible disruptions to businesses due to the reported incident
- Consider implementing suggested government and company-approved actions related to the current COVID-19 situation. The latest updated information is available at (<https://minzdrav.gov.ru/>)

Impact Level Definitions

Impact Level	Definition
Critical	Anticipated disruption intensity is critical, and occurrence is imminent - Supply Wisdom recommends considering immediate review and action.
High	Anticipated disruption intensity is high and/or disruption is likely to occur within 3 months - Supply Wisdom recommends being in a heightened state of readiness to take quick action and confirm response plans/protocols.
Moderate	Anticipated disruption intensity is moderate and/or likely to occur within 3 to 6 months - Supply Wisdom recommends reviewing current mitigation steps and being prepared to take proactive action if and when situation deteriorates further.
Low	Anticipated disruption intensity is low and/or may occur after 6 months - Supply Wisdom recommends taking proactive action if situation does not resolve in approved timeframe.
Informational	The event is pertinent information but does not have a current risk element associated with it.
