Impact Level Definitions

| Impact Level | Definition |
|---------------|---|
| Critical | Anticipated disruption intensity is critical, and occurrence is imminent - Supply Wisdom recommends considering immediate review and action. |
| High | Anticipated disruption intensity is high and/or disruption is likely to occur within 3 months - Supply Wisdom recommends being in a heightened state of readiness to take quick action and confirm response plans/protocols. |
| Moderate | Anticipated disruption intensity is moderate and/or likely to occur within 3 to 6 months - Supply Wisdom recommends reviewing current mitigation steps and being prepared to take proactive action if and when situation deteriorates further. |
| Low | Anticipated disruption intensity is low and/or may occur after 6 months - Supply Wisdom recommends taking proactive action if situation does not resolve in approved timeframe. |
| Informational | The event is pertinent information but does not have a current risk element associated with it. |
