China - COVID-19 Restriction Tightened Amid Surge in Cases

10/14/2022, 11:17:22 AM

- Major industries in China include mining and ore processing, iron and steel, aluminum, coal, machinery, armaments, textiles and apparel, consumer products, petroleum, cement, chemical, fertilizers, food processing, automobiles, and other transportation equipment, including rail cars, locomotives, ships, and aircrafts
- Shanghai is a city located on China's central coast and is a global financial industry and a hub for semiconductor, electronics, and car manufacturing
- On October 12, 2022, Shanghai reported 47 new cases, the highest since July 13, 2022
- Several districts of Shanghai have reported to shut down schools, entertainment, and sporting venues
- Brief rise in COVID-19 cases revived fears of another general lockdown across the country
- China's most important cities have avoided large-scale shutdowns, with officials instead quietly halting a growing list of operations
- The port city of Tianjin has locked down Nankai district, with people not being able to leave their residential compounds and non-essential businesses being suspended
- At least two districts in Zhengzhou of Henan province have been covertly sealed down
- The steel city of Anshan issued a stay-at-home order to all its citizens
- Concerned citizens voiced their complaints over the stealth shutdown on social media
- According to The Guardian Report, about 197 million people were under various degrees of lockdown or control in at least 36 cities across 31 provinces of China
- **Reported COVID-19 stats for China:**
 - Confirmed Cases: 255,168
 - Deaths: 5,226 (2.04%)
 - Recoveries: 245,486 (96.20%)
 - Vaccine Doses Administered: 3,437,728,000
 - Fully Vaccinated: 1,271,408,000 (90.7%)
- Supply Wisdom will continue to monitor the situation and will alert you to any relevant developments

The event is an update to SW's previous alert [China - COVID-19 New Omicron Sub-Variants Detected - 'BF.7' and 'BA.5.1.7'](#)

Impact Level Definitions

Impact Level	Definition
Critical	Anticipated disruption intensity is critical, and occurrence is imminent - Supply Wisdom recommends considering immediate review and action.
High	Anticipated disruption intensity is high and/or disruption is likely to occur within 3 months - Supply Wisdom recommends being in a heightened state of readiness to take quick action and confirm response plans/protocols.
Moderate	Anticipated disruption intensity is moderate and/or likely to occur within 3 to 6 months - Supply Wisdom recommends reviewing current mitigation steps and being prepared to take proactive action if and when situation deteriorates further.
Low	Anticipated disruption intensity is low and/or may occur after 6 months - Supply Wisdom recommends taking proactive action if situation does not resolve in approved timeframe.
Informational	The event is pertinent information but does not have a current risk element associated with it.
