Bolivia - COVID-19 'Omicron' Sub-Variant BA.4 and BA.5 Reported

7/19/2022, 1:01:03 PM

- Bolivia, officially the Plurinational State of Bolivia, is a country located in western-central South America. Natural gas, oil, mining, smelting, petroleum, food and beverages, tobacco, handicrafts, clothing, and jewelry are the major industries
- Amidst the rise in COVID-19 cases, Bolivia discovered new subvariants of omicron BA.4 and BA.5
- As per reports, the COVID-19 cases increased by 62% as of July 18, 2022
- The COVID-19 cases were increasing over the last 10 weeks but in the last three weeks the spike in cases was exponential due to the new subvariants of omicron such as BA.1, BA.2, BA.4, and BA.5
- Authorities requested the citizens to maintain security measures and attend vaccination points
- The symptoms include runny nose, body aches, persistent cough, and headache
- **Reported COVID-19 stats for Bolivia:**
 1. Confirmed Cases: 974,005
 2. Deaths: 21,989 (22.57%)
 3. Recoveries: 907,221 (93.14%)
 4. Vaccine Doses Administered: 14,077,737
 5. Fully Vaccinated: 6,038,801 (52.6%)
- Supply Wisdom will continue to monitor and issue alerts for any relevant development

Impact Level Definitions

Impact Level	Definition
Critical	Anticipated disruption intensity is critical, and occurrence is imminent - Supply Wisdom recommends considering immediate review and action.
High	Anticipated disruption intensity is high and/or disruption is likely to occur within 3 months - Supply Wisdom recommends being in a heightened state of readiness to take quick action and confirm response plans/protocols.
Moderate	Anticipated disruption intensity is moderate and/or likely to occur within 3 to 6 months - Supply Wisdom recommends reviewing current mitigation steps and being prepared to take proactive action if and when situation deteriorates further.
Low	Anticipated disruption intensity is low and/or may occur after 6 months - Supply Wisdom recommends taking proactive action if situation does not resolve in approved timeframe.
Informational	The event is pertinent information but does not have a current risk element associated with it.
